Mathematical Biosciences

an international journal

Volume 116

ERIC P. SALATHE AND CHAORONG CHEN (Bethlehem, Pennsylvania)
The Role of Myoglobin in Retarding Oxygen Depletion in Skeletal Muscle 1

J. EL MOUBARAKI (Fontainebleau, France), G. BASTIN (Louvain-la-Neuve, Belgium), AND J. LEVINE (Fontainebleau, France)
Nonlinear Control of Biotechnological Processes with Growth-Production Decoupling 21

SIMEON M. BERMAN (New York, New York)
Conditioning a Diffusion at First-Passage and Last-Exit Times, and a Mirage Arising in Drug Therapy for HIV 45

CHI-HWA WANG AND ALEKSANDER S. POPEL (Baltimore, Maryland)
Effect of Red Blood Cell Shape on Oxygen Transport in Capillaries 89

ROBERT C. BRUNET (Montreal, Canada), CLAUDIO J. STRUCHINER (Rio de Janeiro, Brazil), AND M. ELIZABETH HALLORAN (Atlanta, Georgia)
On the Distribution of Vaccine Protection Under Heterogeneous Response 111

J. M. SHUMAKER AND J. W. CLARK (Houston, Texas) AND W. R. GILES (Calgary, Alberta, Canada)
Simulations of Passive Properties and Action Potential Conduction in an Idealized Bullfrog Atrial Trabeculum 127

H. E. LAYTON AND JOHN M. DAVIES (Durham, North Carolina)
Distributed Solute and Water Reabsorption in a Central Core Model of the Renal Medulla 169

ANDREJ YU. YAKOVLEV AND ALEXANDER D. TSODIKOV (St. Petersburg, Russia) AND LUDVIK BASS (Brisbane, Australia)
A Stochastic Model of Hormesis 197

M. A. LEWIS (Salt Lake City, Utah) AND P. VAN DEN DRIESSCHE (Victoria, British Columbia, Canada)
Waves of Extinction from Sterile Insect Release 221

BOOK REVIEW

BERNARD D. ROITBERG (Burnaby, British Columbia, Canada)
Infectious Diseases of Humans (R. M. Anderson and R. M. May) 249

Elsevier
